

LeMoyne Normal Institute, Memphis, Tenn.

Ludwig T. Larsen, Principal

IN 1871, Dr. F. J. LeMoyne, of Washington, Pa., anticipating a bequest made in his will for education in the South, gave the American Missionary Association \$20,000 for the establishment of a school at Memphis, Tenn.

The American Missionary Association opened two schools in Memphis in 1866, and in 1867 there were 1,826 students enrolled. These schools were later adopted by the city and supported from public funds. Since 1871, the work has been maintained as LeMoyne Normal Institute. Its property is valued at \$40,000.

"The Dead Languages" Eliminated

It was the wish of Dr. LeMoyne that the work of the institution be conducted along the most practical lines, and he stipulated that the so-called "dead languages" should form no part of the course of study. His wishes have been respected, and the school has remained distinctively an English school, with as much attention to industrial training as time and means permit.

LE MOYNE NORMAL INSTITUTE, MEMPHIS, TENN.

Founded 1871 by the American Missionary Association. Twenty-one teachers and 725 students in 1908. Annual expenses, \$10,000, provided by the A. M. A.

Gloucester Agricultural and Industrial School, Cappahosic, Va.

Wm. G. Price, Principal

LOCATED in a small village on the east bank of the York River, near Yorktown, and in easy reach of nearly fifty thousand Negroes. An independent Agricultural and Industrial School was opened in October, 1890. In the spring

GLOUCESTER AGRICULTURAL AND INDUSTRIAL SCHOOL,
CAPPAHOSIC, VA.

Founded 1890. Enrollment, 10 teachers and 137 students in 1908. Annual expenses, \$4,800. The American Missionary Association gave \$1,000 and the Daniel Hand Fund \$3,400 in 1907-8.

of 1891 the American Missionary Association assumed its obligations and has since conducted the institution.

The property, comprising 7 buildings and 148 acres of land, is valued at \$25,000.

The Courses of Instruction

The school consists of a Normal Training School of the first five years, grammar grades, and an academic course of four years. The farm of 148 acres is a center of interest and industry.

The first five years of the graded elementary school course are organized into a training school for observation and practice. Domestic science, including cooking and sewing, is given special attention. The school is located in a county where no intoxicating liquors are sold.
